

CENTRAL VIRGINIA ELECTRIC COOPERATIVE

P.O. Box 247
Lovingsston, VA 22949
800-367-2832

**RATE SCHEDULE LP
LARGE POWER SERVICE**

AVAILABILITY

Available to consumers of the Cooperative located on or near its three-phase lines whose load requirements exceed 50 kVA on more than one occasion in 12 consecutive months.

TYPE OF SERVICE

Three-phase or single-phase service at standard secondary voltages may be provided in those instances where its usage will not be detrimental to the service of other consumers. Such service is available at standard primary voltages where the consumer's service is metered on the primary side of the consumer owned secondary transformer.

MONTHLY RATE

Metering and Billing Charge per month\$ 55.00

Distribution

Basic Service Charge per month\$ 150.00

Demand Charge per kW \$ 4.00

Usage Charge per kWh\$ 0.00775

Electric Supply

Demand Charge per kW \$ 7.00

Energy Charge per kWh.....\$ 0.046030

Electric Supply Energy charges are subject to the Power Cost Adjustment Rider as filed under Rate Schedule C.

DISCOUNT FOR METERING AT PRIMARY VOLTAGE

The demand and energy charges will be reduced by 3% when service is taken at primary voltage and the consumer owns and maintains all equipment on the load side of the meter.

MINIMUM CHARGES

The monthly Minimum Charges shall be the Metering and Billing Charge plus the Distribution Charge. The Distribution Charge is defined as the greater of the following: (i) the Distribution Basic Service Charge plus the Facilities Charge, if any; or (ii) the sum of the Distribution Basic Service Charge, Distribution Demand Charge, and Distribution Usage Charge.

FACILITIES CHARGE

Facilities Charge shall be based on load requirements or transformer capacity, whichever is greater. For consumers whose load exceeds 100 kVA or who require more than 100 kVA transformer capacity, the monthly minimum Facilities Charge shall be applied for each kVA over 100.

Facilities Charge, per kVA for all kVA over 100 \$0.95

SCHEDULE LP**Page 2****DETERMINATION OF MAXIMUM DEMAND**

The maximum billing demand shall be the maximum kilowatt load used by the consumer for any fifteen (15) consecutive minutes during the month for which the bill is rendered as indicated or recorded by a maximum demand meter or lagged thermal demand meter installed by the Cooperative or as adjusted for power factor, whichever is the greater.

POWER FACTOR

The consumer agrees to maintain unity power factor as nearly as practicable. Where the overall power factor of a consumer's load is less than ninety percent (90%) lagging, the Cooperative will determine the billing demand by multiplying the maximum demand recorded by the meter during the month by ninety percent (90%) and dividing the product thus obtained by the higher of the monthly Average Power Factor or the monthly Peak Power Factor expressed in percent. The Cooperative reserves the right to measure power factor at any time. The Average Power Factor, the Peak Power Factor and Billing Demand shall be determined by the following formulas:

$$\text{Average Power Factor} = \frac{E}{\sqrt{E^2 + R^2}}$$

where E is the energy in kilowatt hours for the month and R is the reactive kilovolt ampere hours for the month.

$$\text{Peak Power Factor} = \frac{KW}{\sqrt{KW^2 + RKVA^2}}$$

where KW is the peak real power demand for the month and RKVA is the peak reactive power demand for the month.

$$\text{Billing Demand} = \frac{\text{Measured Demand} \times 90\%}{\text{Monthly Power Factor} \%}$$

TERMS OF CONTRACT - ANNUAL OR SUCH TERMS AS MAY BE REQUIRED BY TERMS AND CONDITIONS FOR ELECTRIC SERVICE**CONDITIONS OF SERVICE**

- (1) Motors having a rated capacity in excess of five horsepower (5 HP) must be three phase.
- (2) All wiring, pole lines, wires and other electrical equipment beyond the metering point, exclusive of the service transformers and protective equipment, is considered the distribution system of the consumer and shall be furnished and maintained by the consumer.

TERMS OF PAYMENT

Bills are due when presented.
